

BrainSTEM Learning: Little Brains Chemical Engineering (6 Weeks)

Description: Chemical engineering uses science to process raw materials and chemicals into useful forms. They can lead to the discovery of important new materials and processes. These discoveries may be useful for other engineering disciplines or just to make our lives easier.

The little brains will learn about solutions, chemical reaction, mixtures, solids, liquids, absorption, and more concepts while using his or her creativity and curiosity the STEM methodology.

Program Details:

- K-1 boys and girls
- 3:15-4:15pm, Gym Note: Dec. 1 & 8th classes will be held in the Library
- Dates: Friday 3:15-4:15pm in the Gym-Nov. 10, 17, 24, Dec 1, 8, 15 (*note: Dec. 1 & 8th classes in the Library)
- The maximum class size for K-1 group is 12 students

Cost: \$135 + GST for 6 one hour sessions

K Students will be picked up from their classes and accompanied to the Gym. It may be useful for the comfort of your child to be there for the first class unless they are already attending Rec Center's After school Club and understand the process. Please advise the vendor when registering whether you plan on assisting your child.
